SUMMARY

Versatile Software Engineer with expertise in Full Stack (MERN) and AI/ML. Strong base in algorithmic problem-solving. Passionate about building reliable products and learning fast.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: MERN, MongoDB, Express.js, React, Node.js, Scikit-learn
Developer Tools: Git, GitHub, VS Code, Android Studio, Docker, Amazon AWS, Google Cloud Platform
Design Tools: Claude, Gemini, Codex, Figma, Cursor

PROJECTS

CalNote – AI Powered Scheduler June 2026 - July 2026
Full Stack Development + AI Integration *MERN, TypeScript, Gemini API, Google Calendar API*

- Architected a context-aware AI scheduling engine, enabling the system to dynamically route user tasks around live competitive programming contests.
- Implemented the Strategy Design Pattern to seamlessly toggle between multiple LLM providers.
- Engineered automated background scrapers to aggregate external contest data, synchronized with bidirectional Calendar.

Online Judge Project June 2025 - August 2025
Full Stack Development MERN *MERN, AI APIs, Docker, AWS*

- Built and deployed an online coding judge with AI-powered feedback and multi-language execution.
- Implemented Docker sandboxing (resource limits), Node.js/Express REST APIs, AI API integration; deployed on AWS.
- Launched secure submission pipeline to enable scalable, AI-driven learning

Document Analysis using LLMs February 2025 - March 2025
Machine Learning *Python, NLTK, Hugging Face*

- Team-built system for document summarization and automated Q&A.
- Owned ML modeling: NLTK preprocessing; Hugging Face transformers for summarization & QA.
- Delivered prototype with consistent summaries and answers on varied inputs.

House Price Prediction Model October 2024 - December 2024
Machine Learning *Python, Pandas, Scikit-learn*

- Built predictive regression model for area-specific house prices.
- Focused on feature engineering and Scikit-learn pipelines using location and area inputs.

EXPERIENCE

Winter Research Intern Dec 2025 - Jan 2026
IIT ROPAR

- Worked on research-oriented technical assignments in a structured Full-time Virtual internship program.
- Applied system design and analytical problem-solving principles in MERN Stack.
- Collaborated remotely while following professional engineering practices.

Android App Development Intern May 2025 - Jun 2025
Imarticus Learning

- Built Android apps in Kotlin and Android SDK with robust, maintainable code.
- Developed responsive UIs using Jetpack Compose; applied MVVM for scalability.
- Collaborated with Git and code reviews to improve quality and velocity.

EDUCATION

Vellore Institute of Technology (VIT), Bhopal Sehore, Madhya Pradesh
B.Tech in Computer Science and Engineering *September 2023 – Present*

CGPA: 8.40/10

The Aryan International School Varanasi, Uttar Pradesh
Higher Secondary – Completed *July 2022*

12th: 77.60% | 10th: 86.67%

CERTIFICATIONS

Programming, Data Structures and Algorithms using Python – IIT Madras (NPTEL), Elite Grade
Google IT Support Professional Certificate – Google Skills
Introduction to Machine Learning – IIT Madras (NPTEL)
Programming in Java — IIT Kharagpur (NPTEL), Elite + Silver Grade, Top 5%
Android App Development – Imarticus Learning
